# Your captioning experience has been improved!

You can now customize the **SPEED** of your captions by clicking this button (A) in the **OPTIONS** menu during a call.

With these custom caption settings, you can SEE the whole conversation, exactly the way you like.

### During a call:

Tap **Options** near the bottom of your screen to see the menu. Tap the **Speed** button and then tap the **+** or **–** buttons to adjust how quickly captions will appear on the screen. There are 3 speeds to choose from.

Your selection will be saved for future calls until you change it again. Tap the **Speed** or **Font** buttons again to make more adjustments during a call.

*Example:* If someone is speaking quickly, you can adjust the caption speed to keep up. If you're having trouble reading the captions, you can change the font until the size suits you.

## You can also adjust your captioning experience when not on a call.

#### From the Settings Menu:

To get started, from the **HOME** screen tap the **SETTINGS** icon and the **SETTINGS** menu will open.

On the **SETTINGS** menu find and tap the **Phone** option to open the Phone Settings.

On the **Phone** settings find and tap the **Caption Settings** option to open the options. Then tap **Caption Display**.

From here you can adjust caption speed, font size and screen color.
